

Cinematic Arts & Video Production

CTE Industry Sector: Arts, Media, and Entertainment
CTE Pathway: Design, Visual and Media Arts

As part of Novato High School's prestigious Marin School of the Arts, the Cinematic Arts program celebrates the art of moviemaking, helping students to develop their visual storytelling sensibilities and production skills to become strong filmmakers and even stronger working professionals.

Within this collaborative and hands-on 4-year program, students will gain technical and creative skills in camera, audio, lighting, editing and other production tools, while also developing a more refined artistic approach to develop stories and content that best suits their individual interests. Guest speakers and industry events create an even deeper experience, and students will learn the tools and tricks of the trade will gaining a deeper appreciation of film and the cinematic lifestyle.

Apply through Marin School of the Arts. Sample work is requested, and an interview is held to determine acceptance and placement.

Why Cinematic Arts and Video Production?

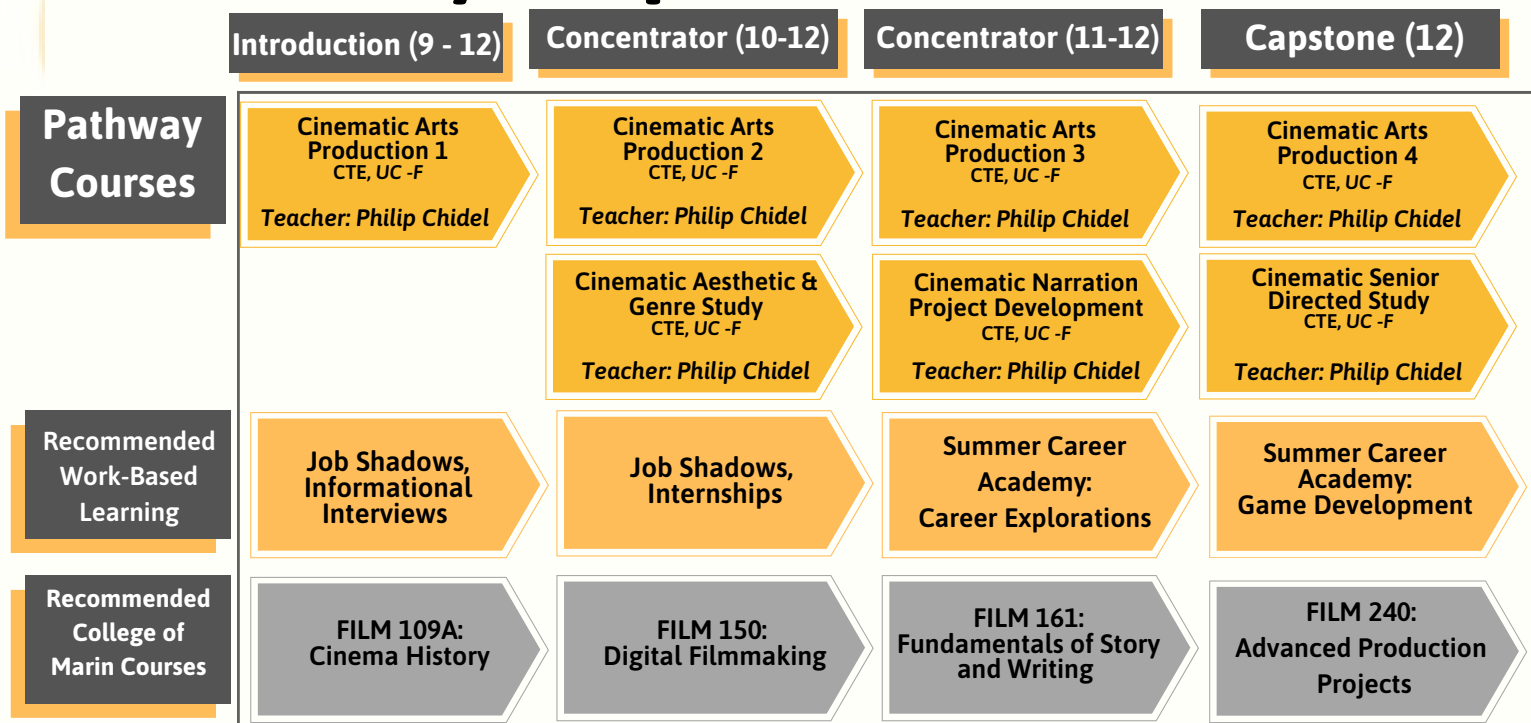

- Master the art of moviemaking.
- Explore creativity through the production of short films and projects.
- Learn through hands-on experience with professional gear and mentors.
- Discover and practice what it takes to make a media-minded career.
- Create a professional portfolio that demonstrates your skills and sensibilities to the working world.

Have fun and learn valuable skills!
